

About GSI

At GSI, we take the evidence from academic research in financial markets and translate it into sensible investment strategies. Our main aim is to deliver improved returns for our clients over the long-term, through 'factor investing'. The factors we look for include size, price and profitability. In addition, we incorporate how companies manage their environmental, social and governance (ESG) responsibilities. The results of these factors inform our view when considering an investment for our portfolio.
