

GSI retains status as a signatory to the UK Stewardship Code

We are thrilled to announce that GSI has successfully retained its position as a signatory to the Financial Report Council (FRC) UK Stewardship Code. We are proud to be among the 287 signatories recognised for our commitment to effective stewardship.

The UK Stewardship Code sets high standards for asset managers, asset owners, and service providers, requiring signatories to submit an annual report detailing their stewardship practices, policies, and activities, along with the tangible outcomes achieved over a 12-month period. GSI's [2023 UK Stewardship Code Report](#) can be found on our website.

Kate Hudson, Managing Partner at GSI, remarked, *"This achievement is a testament to our dedication to responsible investing and demonstrates that impactful stewardship is not solely the domain of large firms. As a smaller manager, we are proving that size does not limit our ability to influence positive change and uphold the highest standards of good governance, social responsibility, and environmental transition."*

Our journey has been supported by invaluable partnerships with our proxy advisors [Minerva Analytics](#) and collaborative efforts with coalitions such as the [Institutional Investors Group on Climate Change \(IIGCC\)](#) and [ShareAction](#). Working collectively has empowered us to strengthen our stewardship practices and continue to push for progress in governance and sustainability.

Full list of signatories can be found on the [FRC website](#).
